## REO A SPEED WAGON FOR EVERY HAULING NEED

Put Your Hauling or Delivering on Tomorrow's Basis  
With these New Speed Wagon Features—

Speed Wagons—always leaders—again revolutionize hauling by furnishing faster, surer, easier and more economical transportation for 93 per cent of all trucking uses.

Thirteen Speed Wagon wheelbases—capacities from  $\frac{1}{2}$  ton to 3 tons—with a comprehensive variety of standard body types—mean that today you can find the right size, capacity and style to suit your requirements.

Six cylinder power, faster acceleration and 4-wheel internal expanding hydraulic brakes give Speed Wagons the Greater Mileage Output that widens your hauling or delivery areas—makes possible more trips in shorter time—and cuts down the number of truck units you must use.

Sturdiness and simplicity in every part—exceptional ruggedness in axles and frame—lengthen Speed Wagon life and enable Speed Wagons to run at a profit long after ordinary trucks are discarded.

Your drivers will tell you—after trying out the new Speed Wagons—that Speed Wagons are easier to turn and to shift, easier to ride in with their well ventilated, comfortable, clear vision cabs.

## LOCAL NEWS ITEMS

Decorated Rooms, near C.P.R. station,  
main street, Vulcan. Rates 50c, 75c, \$1.  
St. Alhelm's Church services, Sunday,  
August 12th. Sunday school 10:00 a.m.,  
matins 11:00 a.m., evensong 7:30 p.m.  
Service at Eastway school 3:00 p.m.

The boarding house in Vulcan, occupied  
and operated by Mrs. Tideman, is now for  
sale or rent. Possession September first.  
Particulars on enquiry, Phone 224, Vulcan.

The house near the mill, occupied by  
Mr. Wegh and his family previous to  
going into their new residence, was purchased  
some time ago by Messrs. Morton.  
The same has been moved to a new location  
on Railway street and is occupied by  
the new owners.

Foundations are being laid for the construction  
of a large building and extensive  
sheds on the lumber yard premises of the  
Vulcan Co-Op. No details of the improvements  
contemplated, but there is evidence  
already of a considerable contribution to  
the general building boom which is now  
in high at Vulcan.

Vulcan again this week has furnished  
another patient to the municipal hospital  
at High River in the person of Miss  
Garnet Sims, who occupies a cot in the  
ward with Mrs. Sims. Between a previous  
extended illness and the present, she  
was a pupil at the Vulcan schools and  
succeeded in passing her exams.

The business representative of the  
Frank Kaplin carnival and midway show  
was in town this week to negotiate a  
return engagement at Vulcan. This is  
the organization that operated some few  
months ago on the lot adjoining the Odd  
Fellows' hall. They made friends with  
the people and quit the town clean. However,  
the license was deemed to be excessive  
and the town was passed up.

There is a rift in the plans for the big  
boxing show announced for August 18th.  
When everything appeared to be fixed for  
perhaps the best card ever offered by the  
Canadian Legion, along comes a demand  
from the "manager" of one of the men  
that certainly would not be granted by  
the local promoters, and the show is off  
temporarily. Boxing bouts here are put  
on by a rule and a method that, assures  
the best possible fairness to participants  
and spectators, and if an adherence to this  
plan results in even cancelling the show  
the promoters will be commended by the  
fans. It can be stated in this connection  
that the promoters post a bond of fifty  
dollars with the town authorities as an  
assurance of the genuineness of the contests.  
There will be disappointment, for the  
line-up of talent at once created an  
unusual interest. But it is expected that  
the time will not be long when another  
announcement will be made.

## LOCAL NEWS ITEMS

Auto truck tire, last on the road coming  
into town from premises of owner. Finder  
is requested to notify The Advocate or  
W. Oldfield, Phone 2608, Vulcan.

The Lethbridge Herald one day this  
week printed an illustration of the front  
elevation of the proposed Memorial Hall  
at Vulcan, giving to the people in the  
south country an idea of one of the enterprises  
in this town.

There have recently been prosecutions  
for auto speeding and scrapping on the  
streets, and the fines have not been light.  
This is but another intimation that the  
performances of the fast and obstreperous  
will not be tolerated.

The attention of the newspaper man  
has been directed to the abundance and  
beauty of the flowers which surround the  
Hunter home in town, and to Mrs. Hunter  
is the credit due for giving to Vulcan one  
of its prettiest gardens. It was a passer-by  
that made the mention of the attractive  
place.

The defeat by South End of Hillhurst  
and Calles, in the football competition  
for the Bennett shield, recalls the defeat  
of Vulcan by this club in the same series,  
which defeat does not now seem so bad  
when a team that was at first reckoned to  
be not very formidable has gone through  
to the finals in the championship.

This is to broadcast the fact that there  
is to be a dance in Vulcan, on Monday,  
August 20th. The event will be under  
the auspices and direction of the girls of  
the basketball club, an assurance of big  
patronage and success. Music will be  
furnished by Len Davis and his orchestra,  
and all dancers will anticipate the pleasure  
of dancing again to music by Len.

Boys and girls from far and near were  
the guests of Lodge 121 at Vulcan on  
Wednesday. It was Elks' "kiddies day."  
Mobilization of the expectant youth took  
place at the park, where there was a one  
hundred per cent realization on a long  
and keenly anticipated event. Preparations  
had been generously made by the  
Big Brother Bills to fully satisfy the well-  
known juvenile appetite for ice cream,  
candy bars, fruit, pop and peanuts, and  
the almost unlimited line of goodies. That  
the boys in purple and blue succeeded in  
proving by the short answer, "we're  
stuffed," made by a pair of the satisfied  
young folks in reply to the query as to  
how they were getting along, and this  
answer would no doubt speak for the  
whole gang. The antics of little lads and  
lasses, going their own way without restraint,  
wearing caps of variegated colors  
and odd shapes and provided with many  
instruments of noise, is difficult of description.  
It was a joyous event, and one also of interest and pleasure to the  
parents who were permitted to participate  
to a degree. Races and fun stunts to no  
end were pulled off, and prizes were  
given to the girl with the longest curls  
and the boy with the reddest head, twins  
were given special attention, and amongst  
everybody was given a prize for something.  
The finale of a great day was a free  
show at the picture house. The Elks are  
a patriotic organization, and it was appropriate  
when they presented all with a nice size  
Union Jack. It must be left to the  
kiddies to tell of the many features  
unmentioned here, and it is a good guess  
that they will.

Vulcan municipal authorities have  
undertaken in splendid manner the  
task of making a proper road on Railway  
street, from the municipal office  
corner west along the elevator row.  
It need not be said how bad this section  
has been during the rain period of  
this year, interest now being directed  
to the fact that it is now to be  
made good. Levels have been taken,  
drainage will have attention, grading  
is being done, and the street will be  
finished with a surface of gravel. It  
is intended and the determination is  
to make of this a real road, the better  
to carry the immense traffic to the  
line of nine grain houses which have  
given a business fame to Vulcan.  
Gravel of quality has been discovered  
on the Harry Adams place at no great  
distance from town, and this will be  
used on the 2250 feet of street that is  
in the making. With gravel available  
at this short distance will revive the  
hope that our main cross streets will  
at some near time be improved with  
this material. Heretofore gravel has  
been the problem.

## LOCAL NEWS ITEMS

With the quick approach of harvest  
the Wednesday half-holidays will soon  
cease.

Population does not make a community.  
Its the spirit of those who live in it.

General fixing-up is under way at  
the Vulcan schools, preparatory to the  
re-opening at the conclusion of the  
holidays.

Messrs. Dyce Allan, Ben Munson,  
Klebe Dewar and Ted Campbell,  
members of Vulcan Lodge No. 121,  
are this week attending the Dominion  
convention of the Benevolent and  
Protective Order of Elks at Regina.

Rev. J. N. Brunton will conduct the  
regular services in the United Church  
next Sunday morning and evening,  
and at Mayview at 2 p.m., and Red  
Cross at 3:30. Sunday school at Vulcan  
at 12 noon. Everybody welcome.

One more vacancy has been made  
on the staff of the Vulcan high school  
by the resignation of Miss M. E.  
Davis, who goes to Calgary. She will  
be succeeded by Miss Glenell Colwell,  
of Oyen. Miss Hazel Cameron comes  
here from Barons to succeed Miss  
McKellar on the staff of the public  
school. It would appear that the  
staff is now complete, and no more  
changes are anticipated.

The Rev. Mr. Jenkins of Aldersyde,  
spent a busy day on Sunday  
last, but he appears to thrive despite  
the long and arduous hours. He  
motored from Aldersyde to Vulcan,  
took charge of the morning service  
there. In the afternoon he conducted  
services at Richmond school and in  
the evening he had charge of the  
services in the Baptist church at  
Nanton. His speedometer showed  
that he had travelled over 100 miles.  
Not bad for a young man of seventy  
one years.

Vulcan people, on Friday last, participated  
in the record exhibition under  
the auspices of the Lomond Agricultural  
Society, and town and district  
contributed to a considerable extent  
to the largest attendance in the  
long history of the event. The excellence  
of the exhibition and the attractive  
features were a splendid reward  
for the attendance and service  
rendered. Those of local people who  
acted in the capacity of judges were:  
D. L. Doane, L. F. Dawson, Mrs. F.  
Simington, Mrs. Dawson, Mrs. Robt.  
Todd, Mrs. L. Douglass, Mrs. Doane,  
Mrs. Schenck, M. E. MacGregor, B.  
R. Lommatzsch, Bob Dadds and Lou  
Douglass.

Vulcan sent its quota to the Elks' carnival  
at High River on the opening day,  
Thursday, and fortune favored one of our  
Vulcan boys, for Mr. David Brooks was  
lucky to hold the ticket to win the grand  
prize of the first day. The prize is a fine  
kitchen cabinet of considerable value, and  
friends of the winner with their congratulations  
offer the suggestion that an article  
of the kind is particularly appropriate  
to circumstances that appear to be  
anticipated. But about the Elks' doings.  
Those from Vulcan who have attended  
have tried for a blanket, took a spin at  
the wheels, sipped at the pink lemonade,  
danced into the hours of night, and there  
was joy unconfined, and all were content  
with the satisfaction of making a contribution  
to an event promoted with the object  
of accumulating funds for benevolent  
purposes.

There is a line of nine in town, and  
how many people are there who really  
know anything of the details of the equipment  
and operation of a modern grain  
elevator? The statement is made that,  
outside of the men employed in the trade,  
there is perhaps not more than one in a  
hundred. This might at first seem odd  
in a town which possesses the record for  
number and capacity of elevators and  
where the elevator business is the chief  
industry, but reflecting, everybody uses a  
telephone and few there are who know  
the instrument technically. The Advocate  
has passed from the majority to the  
small per cent, and through the courtesy  
of Mr. A. K. Baptiste, manager of the  
new United Grain Growers elevator at  
this point, with whom a visit was made  
to the house which is now all but completed,  
and which ranks as the best equipped  
elevator west of Winnipeg. The trip  
through included a visit to the basement  
underground to the narrow top one  
hundred and one feet above the ground  
level. There was splendid explanation of  
methods, and interesting demonstrations  
of operations. By the pressing of buttons  
doors open and shut, pneumatic dumps  
rise up and return as if by magic, and the  
mechanism of various kinds seem almost  
to respond to suggestion. The power employed  
throughout is electric, there being  
four motors with a total of more than  
twenty five horse-power. Everything is  
of the most modern and approved type.  
It is difficult to technically describe the  
devices which make a combination for  
the rapid handling of grain which, to the  
layman, is marvellous. The carrier, which  
elevates the grain, has a capacity of four  
thousand bushels per hour. This is but  
a small mention of a big institution, and  
makes opportunity to announce that on  
the next two Saturdays he will be pleased  
to give time and attention to any and  
all who might desire to see an elevator from  
the inside. In the judgment of the newspaper  
man this is a chance that should not  
be missed.

## LOCAL NEWS ITEMS

A low powered brain is one of our greatest  
dangers.

Blackie ball club, even with the  
favor of Vulcan, did not win the  
Brewery trophy, but they were a  
great team and produced good ball.  
The club has finished the season and  
disbanded. Mr. Rex Dwigans will  
receive many Vulcan congratulations  
on the successful conduct of the club.

The next engagement of the Vulcan  
basketball team is with the High  
River girls at High River this Friday.  
The game will be one of the features  
in connection with the Elks' round-up  
and carnival. The local girls are  
training for the match, anticipating a  
keen contest.

Accommodation in Vulcan for the  
itinerant just now is not equal to the  
demand. It is a busy time in Vulcan  
and many men employed on the several  
works are being cared for. When  
the harvest time comes on the demand  
will be even greater. Provision  
will likely be made to cover the circumstance.

Vulcan Citizens' Band played their  
first engagement since winning the  
band championship at Calgary, at the  
Lomond exhibition on Friday last, and  
the program rendered was a much appreciated  
feature of that most successful  
event. The fame of the band is far  
extended, and this week the officers  
have received a letter from the management  
of the Lethbridge exhibition  
requesting negotiations for a three-day  
engagement at the big exhibition  
in the southern city. It cannot  
be said at this time that the band  
will make the engagement owing to  
the fact that many of the players are  
business men who might be unable to  
give the time at this busy period in  
Vulcan, but it is apparent that the  
attainments of the organization have  
commanded attention in quarters  
where music of class is required.

Mr. Colin McInnes and the editor  
of this journal were the guests of  
Jimmie Bennie, the promoter, at the  
Kestler-Young fistic encounter at  
Lethbridge on Saturday night. The  
courtesy is much appreciated, and the  
contest was much enjoyed. The purpose  
of the trip was the closing of the  
contract with Mr. Bennie for the  
appearance in Vulcan of Elmer Rathwell,  
Mr. McInnes representing the  
Canadian Legion in the promotion of  
a boxing show here on August 18th.  
Mr. McInnes also secured Frank  
Liddle, of Magrath, for the semi-  
windup of the event. The journey to  
Lethbridge was one of pleasure,  
including the view of wonderful fields  
of grain, the sight of highway improvement,  
the beauty of the city, and the satisfaction  
of meeting former friends.

Progress has been rapid on the  
work preparatory to the building of  
the new Memorial Hall by the Vulcan  
branch of the Canadian Legion. The  
main section of the old buildings has  
been moved to a temporary location  
on an adjoining site, and the club  
continues in business. The other sections  
have gone in various directions  
to serve other purposes, and the excavation  
for the large basement is under way,  
and many men and several teams  
and wagons are employed on the job.  
The earth from the same is in demand  
for the building of an approach to one  
of the new elevators and by the town for  
the road-making enterprise on Railway street  
undertaken by the public works department.  
It is quite apparent in Vulcan  
this season that one improvement develops  
another, and may the progress continue  
to the profit of those who make the investment  
and the general betterment of the town and community.

Vulcan municipal authorities have  
undertaken in splendid manner the  
task of making a proper road on Railway  
street, from the municipal office corner  
west along the elevator row. It need not  
be said how bad this section has been  
during the rain period of this year, interest  
now being directed to the fact that it is  
now to be made good. Levels have been  
taken, drainage will have attention, grading  
is being done, and the street will be

intended and the determination is to  
make of this a real road, the better to  
carry the immense traffic to the line of  
nine grain houses which have given a  
business fame to Vulcan. Gravel of quality  
has been discovered on the Harry Adams  
place at no great distance from town, and  
this will be used on the 2250 feet of street  
that is in the making. With gravel available  
at this short distance will revive the hope  
that our main cross streets will at some  
near time be improved with this material.  
Heretofore gravel has been the problem.

## LOCAL NEWS ITEMS

There will be a meeting of Vulcan  
town council on Monday night next,  
the chief business of which will be to  
consider tenders on gravel hauling for  
street building.

K. R. McLean, sight specialist, 212  
Herald Bldg., Calgary, desires to announce  
that he will make his monthly visit  
to Vulcan, at King's Drug Store,  
Saturday, September 1st.

Painting of the Odd Fellows' hall  
is under way, and already improvement  
is discernible. The Advocate man  
this week has contributed his little  
bit to general improvement by  
having his house painted.

Posters and advertisement announce  
the sale at Vulcan of another lot  
of stray horses, rounded up and  
offered on the authority of the government.  
The horses are of a good type  
and well broken. The sale is on  
Saturday, August 18th.

The members of the Vulcan cadet  
corps are in camp at a splendid location  
west of High River. They packed  
up their kits and boarded the auto  
transports on Tuesday morning, and  
reports from headquarters are to the  
effect that all is well and no complaints  
from the boy soldiers.

Report can be made of right smart  
progress on municipal hospital construction,  
and by the time this is read  
the main brick building will have been  
completed. Conditions and circumstances  
have been very favorable and a  
satisfaction to the contractor, and  
the people generally who are interested  
in the institution. Attention is  
being given this week to the sewage  
disposal system that is to be constructed  
in connection with the building.  
The government official inspector  
of equipment is expected in Vulcan  
shortly to have conference with the  
hospital board.

"Vulcan Elks Present Street Fair  
and Carnival" is the prominent heading  
given by The Lethbridge Herald to  
a report of a feature contributed  
to the Lomond exhibition by Vulcan  
lodge of Elks. They established a  
regular midway, with the blankets and  
dolls, canes and caps, pop and hot  
dogs, and the one hundred and one  
devices that furnish the fun of the  
fair. These were generously patronized,  
and the profits were split with the  
fair board and the lodge, to be used  
in the promotion of the exhibition  
and the community enterprises  
supported by the Elks. This joint  
undertaking, which worked so splendidly  
and satisfactorily, has made a  
real contribution to the pleasing  
neighborliness of the towns.

Basketball, like many of the sports  
in Vulcan this season, has not been  
brisk, but the girls on occasion pep  
up to a degree and put over a performance  
that adds to their record of victories,  
and incidentally increases the cash  
in the treasury. It can be said  
here to the credit of the girls that  
the club is perfectly solvent and  
with no money liabilities. Such a  
game as suggested was that played  
at Lomond on Friday last, as a feature  
of the fair, when Vulcan won by a  
12-16 score, and their reward was a  
prize of twenty dollars. The game  
was a satisfaction to the fair management  
and the spectators were keenly  
interested. The young lady athletes  
who represented Vulcan in the contest  
were Jessie Packwood, Lillie Thompson,  
Flora Newton, Norma Vanskiver,  
Isabel Flood, Loren McKay, and  
Lorna Ferguson.

Local events of the week include a  
fatality. Ted Frodeen, a man who  
has been employed on farms in the  
district for many years, was the victim.  
He was working on the premises  
of Mr. James Dew when the accident  
happened that resulted in his being  
killed. The exact details of the event  
will never be known, but he was riding  
a horse and driving a team, and was  
crossing from one field to another,  
and it is supposed that the horse  
he was riding came into contact  
with the fence wire and was thrown,  
and in the fall the animal rolled onto  
the man. It is thought that an hour  
or two had elapsed before discovery  
of the accident, and the injured man  
was still sufficiently conscious to say  
that the horse had fallen upon him.  
He was taken at once to the municipal  
hospital at Bassano, but passed out  
shortly after arrival there. The body  
was later brought to Vulcan and interred  
made at the local burial park. A  
brother and sister, who reside elsewhere,  
attended the funeral. The burial  
services were conducted by Rev. O. P.  
Burris, of Vulcan. It is a co-incidence  
that the deceased was in company with  
the late Mr. Peterson, who was killed  
by a fall from a wagon and the wheels  
passing over him while on the road into  
Vulcan some year or two ago. Strange  
that two should meet death in a violent  
manner, and strange also is the fact  
that the third person on the wagon  
separated minutes to both at the widely  
separated times of their injuries and  
attend the funerals of both.

## "JUST AS THE TWIG IS BENT, THE TREE'S INCLINED"

BELIEVING that the individual thrift of our citizens is the backbone of Canada's prosperity, the Bank of Montreal does all in its power to encourage systematic saving on the part of youth.

At all of our Branches we welcome the savings accounts of children. Start such accounts for all the young people of your family and let them early learn the earning power of money.

### VULCAN ADVOCATE VULCAN, ALBERTA

#### GARDENS LOVELY

The forehanded gardener is contemplating the lovely mallow blooms in his garden, the late roses, the ripening tomatoes and that profusion of long-blooming flowers with which Nature prefaces the fall, and he is reflecting that now is the time to steal a season and plan for another year. There is a surprising number of things that winter does not harm but which, if planted in the fall, gather strength and substance underground and so are a season ahead when spring comes. The whole art and science of amateur gardening is comprised in patience and thoroughness. Hardy bulbs can be planted in the fall, the crocuses and hyacinths which gladden Easter-tide. Most perennials profit by fall planting. The gardens are lovely this year, as anyone who takes the unaccustomed exercise of walking through suburban streets and avenues cannot help noticing. The glories of one's own garden should be sufficient stimulus to lay the plans for a colorful setting next year, and it is almost time to begin the work, while the planning is due now.

#### IT WAS NOT AN ISSUE

Although the Government of British Columbia was defeated in the recent elections, there does not appear to have been any issue between the two parties on prohibition control as applied to the sale of liquor. In other provinces whenever a campaign was on the prohibitionists tried to make it appear as if control in British Columbia was a failure and a farce that would be ended once the people had a chance to speak. But this chance to speak passed by and neither party thought it good politics to assail government control and advocate prohibition. There are defects in every measure dealing in this problem but the provinces that now have control measures such as we have in Alberta are not likely to look for remedy in total prohibition any more than they would look for a remedy for speeding in the abolition of motors.

Almost invariably when huge dividends are promised the capital invested is in danger. And when a real "good thing" (so good it must be bought at once) is peddled about the country there is ample cause for suspicion. "Good things" are not peddled, and any wise investment will permit of consideration and investigation.

Washington university authorities have offered young Williams, Canada's world champion sprinter, a free course in that seat of learning. Which, of course, is the first step in an effort to claim this young man as a United States athletic product.

"No cocktail president" is the slogan of a denominational conference in the United States. Wonder what George Washington would say about it? But they didn't have cocktails in his day.

#### CAN RETIRE NOW

If Tunney likes to retire from the ring he can do so and no one may say "scared." He licked the champion and then relished him as an ex-champion. Rickard knows of no one living today who is Tunney's equal. Nor does anyone else. He is under no obligation to wait for a real contender. The fans that are coming will see Tunney decline while some fighter is developing who can defeat him. He can retire now at his zenith of his powers and his fame, and he shows wisdom in doing so. It can be said of him that no other fistic champion ever wore the laurels more worthily. It can be said against the patrons of the prize ring that he was not popular. They wanted someone more or less "colorful," like Sullivan or Johnson or Dempsey.

#### EXPLODED, BUT EXPLOSIVE

That pretty story about the foreign prince or chief who asked Queen Victoria the secret of Britain's glory will never die. It is too useful to the pulpiter. The answer that Victoria made was a gesture toward an open Bible on the table. When the story appeared in print she denied it in writing, but that makes no difference. It survives the Queen and will survive many more monarchs. A story of the same sort persists. It is of a sailor being swallowed by a whale and thrown up alive after some hours or days, unfortunately the name of the ship was given, the captain denied it in writing, but the story is still being used to bolster up the Jonah episode, and used by preachers who ought to know that a whale is not necessary to the Jonah story. What the Bible says is that the Lord prepared a great fish for Jonah's reception.

#### IT WAS COMING TO HIM

Tex Rickard admits a loss of \$15,500 on the Tunney-Heeney fight, and attributes it to July and radio. He says he wanted the fight in September when New Yorkers and others are not away on vacation. That might have helped, but it would not have saved him from loss. He knew about radio before, and had his other fights broadcasted without loss. Why the difference now? Our guess is that the last Tunney-Dempsey fight queered the Tunney-Heeney scrap. It was broadcasted from ringside and in the newspapers next day that thousands who paid good money for seats were so far away from the scene of action that people who were thousands of miles away knew more than they about what was going on in the ring.

What was the difference between Washington and England? One was the father of his country and the other was the country of his father. The last war didn't turn out to be the "war to end war" but this peace threatens to be the peace to end peace.

If farmers in the west would spend more time trying to grow trees on their farms they would find it worth while. Farmers should line their holdings with hedges of caragana which after all is easily grown. In a few years after planting they would have a splendid windbreak.

"Three sidewalks of New York" is the Democratic campaign song now that Al Smith is the candidate. It starts "eats side, wets side."

#### TWO TENNIS STARS

There is girl we like—Helen Wills. Don't know her, never saw her, except in pictures, but we like her just the same. She has a comely figure and a wholesome face, and never says anything that should not be published—otherwise it would be Suzanne was all right in a way, tender player premiere, but Oh, so temperamental! More colorful, of course, than Helen but huffy, volatile, explosive. If we were a bachelor like Mackenzie King, R. B. Bennett or E. W. Beatty, and had the choice, we wouldn't hesitate a moment, we'd call Suzanne up by long distance telephone and tell her so, too.

#### A FINE IDEA

Thirty-five school boys and twenty-five school girls left London, England, Aug. 4 on their journey to make a tour of Canada. The Rt. Hon. J. M. Amery, secretary for the Dominions, who was at Euston railway station to bid them farewell, in his parting address said that no matter what he told them about Canada, they would return like the Queen of Sheba and say: "Not half as wonderful." They would find it a wonderful country and would meet people differing from them slightly, but not in heart or aspirations. The Prince of Wales sent them a message: "What you see in Canada and the friendships you will make there will, I hope, form a bond between you and Canada that will last a life-time. The earlier in life we contract such empire bonds, the better it will be for the destiny of the race."

"Cutting in" causes more motor accidents on the public highways than any other form of reckless driving. In fact, so prevalent has this unwise practice become that the government, we believe, ought to initiate a special educational campaign calculated to deter people from "cutting in" teaching them that to overtake and pass a motor car one ought to be sure of having ample time and room to do so. In addition, it should be emphasized that offenders who accidents by "cutting in" will be severely dealt with.

Hon. J. D. McLean, Prime Minister of B. C., says he never expected defeat. That's just when he should have expected it.

Gene Tunney says he is not going to fight after he marries, another evidence of the triumph of hope over experience.

Tex Rickard should be able to make up his loss by putting his hands into his Gene's pocket.

Some are born fools, some acquire foolishness while others sign on the dotted line whenever asked.

#### PRaise FOR ALBERTA ROADS

When one stops to consider that we had no well graded or gravelled highways in Alberta just six years ago, and that now we have several hundred miles of gravelled roads, and many more miles being prepared for graveling under a constructive highway policy, we should give credit where it is due so remarked a prominent Albertan when discussing the Alberta roads.

The handling of the highway program by the Government is safe and sane when one considers the present tax rate and our ability to pay. The difficulty of getting gravel and the high cost of grading is such that credit is coming to the Public Works Department, in functioning so efficiently and economically.

Dr. Doolittle makes the statement that Americans are now spending about \$250,000,000 annually in Canada and at the rate of increase in tourist traffic the amount will reach \$500,000,000 in ten years. Meanwhile it is up to Canadians generally to treat tourists with every courtesy and consideration. Courtesy and fair dealing and good roads are powerful attractions. The satisfied tourist always returns.

Insurance for automobiles in respect of liability for damage to property and personal injury should be made compulsory. Cars are being driven by people who, when an inevitable accident occurs, have no money available to pay for the damage for which they are responsible. Insurance should be considered as part of the cost of operating an automobile.

The sporting public hereabouts were elated over the splendid victories of Percy Williams, the Vancouver youth who won the 100-metre champion sprint at the Olympic, and then went one better when he captured the 200-metre world title.

The dispute as to who won the war will be settled as soon as the disputants see that it wasn't won at all.

## Notice to Truck Buyers

Now is the time to give consideration to the truck you are going to buy for Grain Hauling this season. Before making your final decision to buy let us bring to your notice the following parts which are vitally important factors.

Has the dealer that you are contemplating buying a truck from, an adequate stock of repair parts for the truck, and can you afford to be held up from two days to a week awaiting repairs?

Has he storage facilities to accommodate your truck during stormy weather?

Has he an adequate repair shop maintaining first class mechanics and service facilities?

These things we can assure buyers of Chevrolet and G.M.C. Trucks will not be found lacking in our garage. We have a very large stock of parts, excellent storage facilities and back these two features with an excellent staff of expert mechanics. If you have not already placed your order for a Chevrolet or G. M. C. Truck, it is advisable that you do so at once.

## HOG SCHEME CHECKED

Alberta farmers have had a demonstration this summer that get-rich-quick schemes are not necessarily associated with gold mines or fraudulent company promotion. A gang of high pressure salesmen flitted through the province selling pigs, meeting farmers on their own ground, as it were. Buyers were talked into paying \$105 each for Chester White sows which, at most, were not worth over \$35, the special inducement being that the vendors would take back female progeny at \$35 a head.

Government agents and the packers' representatives acted with commendable promptness in pointing out that the scheme was fundamentally unsound because the market for the progeny would soon be flooded if the vendors bought back second generation females in anything like the number that purchasers of the sows were led to believe. It was further pointed out that the Chester White breed is not suited to Canadian market requirements; that many poor individuals were being supplied; that many of the expected litters would not be eligible for registration; and lastly, the public was informed that these same promoters had worked the identical scheme in various places in the last eight years, in each case leaving many purchasers in the lurch, after having relieved them of juicy sums for breeding stock. Nevertheless, the pig salesmen continued till they had disposed of over 600 head. Their company was duly incorporated. The deal was perfectly legal. There is no law to prevent a man from paying \$105 for a sow if he wants to. The game went merrily on in spite of strong counter measures by the Alberta Department of Agriculture, until an outbreak of hog cholera, allegedly introduced by Chester White importations, put restrictions on hog movements through the province.

The concern which sold these pigs will probably do one of two things next year. As their sales were relatively light, they might live up to their promises and thereby stimulate the sale of vastly larger numbers of high priced sows. It is, however, much more likely that they will quietly withdraw, leaving purchasers to liquidate their holdings on the stock yards. If the first course is followed it will be necessary to find another crop of suckers to keep the game going, and it is to be expected that Saskatchewan and Manitoba will in time be invaded. It must be evident to everyone concerned that eventually any pig scheme based on a buy-back arrangement must fall of its own weight, as pigs multiply rapidly. For the good of the farmers of Western Canada generally it is to be hoped that the whole business collapses immediately despite the hardship it may entail upon a small number.—Grain Growers' Guide.

## WILL INVESTIGATE

Prominent American Will Spend a Week in High River to Investigate Producing Cost of Our Cattle

Dr. Connor of Washington representing the Permanent U. S. Tariff Commission will arrive in Alberta shortly to spend a week. On August 15 he will be in High River, to meet with local cattlemen. The purpose of his visit is an investigation of the producing costs of Canadian beef cattle, as compared with that of other competing countries. And his confidential report on his findings may, it is hoped, have some effect on the tariff on Canadian cattle.

The American tariff is based on the production cost of the various countries and on the report of the Tariff Commission relative to those costs, the President is empowered to raise or lower the tariff 50 per cent. without consulting Congress.

Ever since the passing of Fordney-McCumber tariff the Western Stock Growers Association has spent time, money and effort in an endeavor to have the Tariff Commission investigate the cost of cattle production in this country.

This investigation on the part of Dr. Connor is the first tangible result of the effort. And his meeting with the cattlemen to hear their statement of producing costs, is, at least, something accomplished. Much is hoped from his investigation.

### DISCUSSING IMMIGRATION

Discussing the assertion credited Ramsey MacDonald in Quebec in the past few days to the effect that Canada wanted only the cream in immigrants, the Evening News says:

"What fools the Canadians would be if they welcomed derelicts. We map pass over the fact that all of Canada, save the fortunately well populated section of lower Ontario and a strip of British Columbia coast is a country fit mainly for heroes to live in. Our Canadian brothers would not wish us to stress this point too strongly, but we may say without further sensitive feelings that the hardy Scot from the Orkneys or Western Isles has a better chance of becoming one of Canada's leading citizens than a product of some town slum. 'Canada's answer to MacDonald will be 'Keep your derelicts out, better still, stop them becoming derelicts.'—the newspaper concludes.

### PLAY SAFE IN THE WATER

Drowning accidents are reported from many parts of the province as people flock to the lake resorts and hot weather causes a rush of bathers to every available swimming hole. The greater number of casualties are due to carelessness swimming in unsafe areas, taking chances in boats, going in the water too soon after eating, and similar dangerous practices. In this connection the annual list of six suggestions made by the Ontario Safety League, should be read with close attention; there is nothing particularly new in them, but they are worthy of repetition:

1. Learn the proper rescue method of resuscitation.
2. Bathe in protected areas only.
3. If you have heart trouble do not go swimming.
4. Wait two hours after eating before going into the water.
5. When diving be sure the water is deep enough to ensure safety.
6. Do not bathe or swim alone. It is safest to have companions with you in case of accident.

### AN AUSTRALIAN EXAMPLE

Sir Samuel McCaughey's legacy to the soldiers of Australia is probably the finest tribute of any single citizen of the British Empire. When he died he bequeathed the bulk of his estate, valued at about a million and three-quarters sterling, to the public purposes.

It will yield at least \$3,000,000 for the purpose of assisting the technical education of children of dead incapacitated members of Australia naval and military forces who served abroad, and already 5,800 soldiers' children have received, or are receiving, benefits from the bequest.

In all about 13,000 will be aided, according to an estimate by the trustees, the A. I. F. Canteens Fund Trust, of which Mr. N. Lockyer is chairman. The assistance given includes provision for school fees, books, etc., fares and sustenance allowance when necessary at junior and senior technical schools, commercial, accountancy and agricultural colleges.

Cash rewards totaling \$230,000 have to date been provided for trade apprentices, of which there are already 2,000 as an incentive to efficiency and good conduct, while special help is given to deaf and dumb, blind crippled, and mentally deficient children.

The trustees wish it to be remembered that it is not a charity, but a legacy. The children of the dead and seriously incapacitated returned men are entitled by right to participate. The Mail, Sydney, N.S.W.

## FOREST RANGERS

They Work Faithfully in Protecting Our Forests Against Fire. Country West of Here Unexcelled.

Recently it was our pleasure to motor with friends to the forest reserve and beyond that to the Ford coal mine. The roads were excellent and along the route of march, fishermen could be seen luring the mountain trout out of the Highwood river. It was a restful scene. The forest reserve is rapidly recovering from the destructive fire of 1910 and Jack pine and other native trees are growing so rapidly there will be no evidence of that terrible fire which destroyed so much valuable timber in that year.

At the forest ranger's home we remained a short time to converse with Fred Nash and his assistant Mr. Waikie. These officials are keenly interested in the welfare of our forests and they go out each spring to war against the greatest enemy of our national income, which is fire in our forests. They do not look for, nor do they get applause. They labor for the love of trees, shrubs and wild flowers. They encounter many difficulties and witness many acts of carelessness on the part of campers, but through it all they maintain a quiet demeanor. All they ask campers is that care be exercised by the tourists with camp fires, cigarettes, pipes and matches. Without proper support their efforts will be hopeless. Every tourist entering the forest reserve should give earnest thought to the business of protecting our forest and help these men. In case of fire, Mr. Nash has at his command five horse power Twin Engine wood gas line engines, with 2000 feet of hose that weighs 10 pounds. These engines can be put into action within fifteen minutes after the airplanes on patrol notify him of a fire outbreak. In case of a big fire they have equipment for 100 men and effective work can be done in short time. The engines and hose can be quickly packed on pack horses to the scene of fire. There has been no fire in the reserve since 1910, all of which is more or less due to the excellent work performed by the forest rangers supplemented by the High River Air Patrol.

There are 100 miles of pack trail open to various beauty spots including Kanakas Lakes, Making and keeping open trails and removing fallen trees from roads and trails, keeping an eye on campers who carelessly neglect putting out their fires before leaving are some of the duties that fall to their lot.

Last winter 15 head of mountain sheep made the forest reserve their rendezvous and they were quite domesticated and paid visits to the rangers' home as did ten head of Elk the first seen this year.

Motoring west from the forest rangers' home is a delightful motor road, as far as Ford's mine. We doubt if the scenery can be duplicated anywhere in North America. There on to the end of the trail, to Ernest Ford's picturesque log cabin house where a cordial and most hospitable greeting was extended by one of nature's gentlemen. It was a delightful outing spent in the presence of charming people and amidst the splendor of mountain scenery unexcelled anywhere.

### CATTLE TARIFF

Hon. Vincent Massey, Canadian minister to Washington, has succeeded in inserting the thin end of the wedge which will open up discussion on the subject of the Canadian cattle tariff well-informed traders here believe.

Their belief centres around the fact that a committee of the United States tariff board is about to leave for Western Canada to inquire into the cost of cattle production. It is stated that such research is always preliminary to serious consideration of tariff problems.

The theory of the tariff makers, it is pointed out, is that an import tariff must equal differences in cost of production between levying and exporting countries.

Traders on the stock markets are of the opinion that the present tariff affords no protection to American cattlemen and merely malets Canadian growers.

### CANADA GIRLS AT OLYMPIC

The first olympic women's track and field championship went to Miss Caterwood who won the high jump, and established a new world's record with 5 feet 2 inches. The girl is from Saskatchewan.

The girl's 400 metre relay team, composed of four Toronto girls, was easily won by them in a record breaking time, 48.25 seconds with the U. S. second, and Germany third. Thus the two victories of Percy Williams in the 100 and 200 metre sprints are balanced by the female contingents' achievements.

### A VACATION NECESSARY

Dr. Charles H. Mayo, the noted surgeon, declares that holidays are necessary to the prolongation of life and the attainment of the highest mental.

He especially commends the habit of English clerks and workmen, who usually spend their week-ends in the country or at the seashore, where they enjoy surroundings entirely different from those in which their daily tasks are pursued. This change of activity and scenery is the most important of all, and is the best possible recreation to prevent becoming fagged out from one's work, says Dr. Mayo.

There is no doubt that most persons fail to take advantage of their opportunities to get away from and forget for a time their regular occupations. The hustle and bustle of the towns and cities are trying on both body and mind.

Perhaps we could do more and better work if we could make it a practise to spend our holidays, week-ends and vacations as far away from shop and office as possible.

## FIRESTONE WICK TEST

The jar at left is filled with Gum-Dipping solution. The other jar is empty at first. One end of the wick—made of cords used in Firestone tires—is placed in the solution, the other in the empty jar. Solution penetrates entire length of the cord wick showing that Gum-Dipping saturates the cords.

This exclusive Firestone process insulates every fibre with rubber, reduces internal friction and gives thousands of extra miles. Firestone tires cost no more than ordinary tires. Your local Firestone Dealer will gladly serve you, and save you money.

# Vulcan Herald

Vol. 1. VULCAN, AUGUST 10 No 24

## Vulcan Herald

Published in the interests of the People of Vulcan and the Farmers of the District. R. J. MONDS, Editor.

### EDITORIAL

We are hearing a lot of compliments from tourists and other travelers these days on what a fine looking community this is. Glad you noticed it folks; it seems that way to us too.

### LOOK THEM OVER

Look over your harvesting machinery at this time of year. See what you need in the way of repair parts. Tell us. We'll do the rest with genuine I. H. C. repairs too.

### A QUESTION

How long has it been since a linen duster was seen decorating the landscape.

## ENNUI

His wife started nagging him. She thought that he would weep. But, shucks, instead of arguing

He simply fell asleep

90,000 MEN

According to government figures, 90,000 less men are now employed in Western grain fields each year since the use of the Combines has displaced the old methods of harvesting and threshing. Are you still carrying the burden of that extra help during the harvesting and threshing season?

### LUNCH

"Hot stew?"

"No, 'stoo hot!"

### OUR VISITORS

A Vulcan man says: "Summer visitors usually have a few shortcomings but many longstays."

## HER TURN NOW

"Now I'll do the dictating," said the stenographer, after she married her boss.

### BINDER TWINE

Don't forget to let us have your twine order as soon as possible.

### SCIENCE NOTE

Now that science has succeeded in giving fragrance to fertilizer the laboratory wizards might see what they can do with unlabeled cigars.

### ASK DAD

"We are told that babies should be a delicate pink. Most are robust yellows."

Good Equipment Makes a

Good Farmer Better.

## TALKED ROADS

At a U.F.A. picnic held at Waterton Lakes last week Premier Brownlee outlined the responsibilities of citizenship, dealt at length on the economic problems of highway development in Alberta. His address was not along political lines but on "The State and the Responsibility of the Individual to the State," in which he discussed several outstanding problems of the province. Speaking of our highways and the cost of graveling them, he went on to explain for the main arteries it would cost \$60,000,000, for the other 40,000 miles of highway it would cost another \$200,000,000. Suppose the government was to borrow \$20,000,000 a year for roads. It would require \$2,000,000 in taxes per year to pay the charges on this. The government would have to double the supplementary tax and add 2c on the gasoline tax. In conclusion, Mr. Brownlee uttered a strong plea in behalf of tree planting and the beautification of farm homes. His recent European visit had converted him to this doctrine, he said. The beautiful countryside in both France and England had come from the cultivation and garden planting conducted by generations upon generations of home-loving farmers.

"It can be done in Alberta, too," stated the premier. "Think something of the surroundings of your home. You have got to play the game with your wife and with your children. They want the beautiful and you can give it to them in the form of a beautiful school and home surroundings and a tree covered countryside."

G. G. Coote, M.P. for Macleod, spoke after Premier Brownlee. It was evident that "you want good roads because you have autos," and the revenue from automobile taxes goes to the Dominion government. Last year it had \$113,000,000 from customs duties on autos and parts and \$33,000,000 from sales tax. And only \$20,000,000 of this had gone to the provinces in the form of aid for highway construction.

"What we want is more federal government assistance for roads," declared Mr. Coote. "The extra price we pay for cars should be spent on bettering the roads."

Mr. Coote also gave some interesting opinions on the recent session at Ottawa. The new Canadian embassies he considered as "simply another step in the building of Canada as a nation." The large appropriation towards the governor-general's residence raised in his mind the question of whether the prime minister and the minister of finance could not be given similar large salaries as that of the governor-general. Why should the prime minister only get \$18,000 when the director of the C.N.R. gets \$60,000, or the minister of finance only \$14,000 when the directors or heads of banks get around \$60,000?

"Can we expect to get the best men in public life when the banks give more than the government?" he asked.

A Manitoba Judge was dismissed from the Bench for bad conduct. He patronized bootleggers and consorted with people of ill repute.

## OIL PRODUCTION

Royalite No. 4, the "ace" well of the Imperial Oil company in Turner Valley, produced 15,441 barrels of crude naphtha during the month of July, or an average of 498 barrels per day, according to a monthly statement issued on August 3 last by officials of the Royalite Oil company, Limited.

Royalite No. 8 was second in line with a total production of 8,103 barrels of crude naphtha for the month, or an average of 261 barrels per day.

Royalite No. 6 produced 5,643 barrels of crude naphtha with an average of 182 barrels per day, while Royalite No. 7 produced 2,567 barrels, an average of 82 barrels a day.

Illinois-Alberta produced 1,849 barrels or an average of 60 barrels a day, and the McLeod well produced 599 barrels or 19 barrels a day. Dalhousie No. 1 was at the bottom of the list with a monthly production of 170 barrels or six barrels a day.

A considerable amount of crude oil was also secured from Turner Valley wells during the month. The Home No. 2 well produced 2,477 barrels of crude oil, an average of 80 barrels a day, and the Okalta No. 2 well was second with 1,765 barrels or 57 barrels a day.

Production was much lower in the other wells. The Foot Hills No. 2 well produced 544 barrels of crude oil during the month, an average of 18 barrels a day. The Home No. 1 well produced 657 barrels, an average of 21 barrels a day. The Royalite No. 10 produced 397 barrels or 13 barrels a day, and 371 barrels of crude oil were secured from the Royalite No. 11, or an average of 12 barrels a day.

Dalhousie No. 5 was near the leaders with 1,401 barrels for the month or 45 barrels a day.

McLeod No. 4 well was down to 3,660 feet Saturday morning and officials estimated that the limestone would be reached in the next 50 feet. The No. 3 well was down to 4,340 feet and still drilling.

## PLANT CARAGANA

The harvesting of caragana seed and the greater utilization of this plant to the extent of adopting it for use in a tree fencing scheme round the prairie farms, is suggested by John J. Hanlon, of Hanna, in a letter to the press.

The seeds, he declares, are this year very abundant, due to the very favorable climatic conditions. These seeds will be ready to pick soon, and Mr. Hanlon recommends that children should be encouraged and interested to collect them, for by a more general use this hardy and adaptable shrub can be made a valuable asset of the province. The seed is retailed at \$2 pound.

The caragana is easily grown in almost any kind of soil, and grows about a foot a year to a height of fifteen feet under favorable conditions. The soil should, however, be cultivated previously, and the seed sown in spring or fall, and not more than 3 in. deep. An instructive book on "Tree Planting on the Prairies," by the department of the Interior Forestry Service, is very helpful, not only concerning caragana, but all trees. It can be had on application.

If caragana were put to a more general use, declares Mr. Hanlon, it would add much to the appearance of the country. He advocates their use in tree fencing schemes, for this would improve the appearance of the land and also protect the soil and the crop from the parching winds, which dry the soil and the grain in years of little rain. "Perhaps some day quarter sections will be surrounded by these trees and crossed down the middle, dividing the farm into 40-acre fields," the caragana advocate continues.

In the Cardston and sugar beet sections, the caragana should, he says, make a valuable protection to the soil, and in three or four years it would make real protection for other trees useful for their shade or for firewood. A feature of Eastern Canada and the States is the park-like appearance of the country, due greatly to the trees growing along line and field fences.

Mr. Hanlon suggests that for the stimulation of interest, caragana and tree clubs be formed, and that prizes should be awarded for:

Largest amount of seed gathered. Largest amount sown according to specifications. Best uniform half-mile for 1, 2, 3 years.

Best cared for hedge. Best protected hedge.

Despite the hail storms of last week High River looks beautiful now. Every house has ample shade trees surrounding the place, well kept lawns and green and well kept boulevards are so attractive, we have every reason to be proud of our town.

## BATTLE OF THE CENTURY

"It was the most exciting thing I ever saw, and I've seen a few exciting things in the Rockies," said Mrs. Edmunds, wife of Samuel C. Edmunds, prominent business man of Philadelphia, describing an attack on a mountain goat by a mountain lion. Mr. and Mrs. Edmunds who were out shooting with the motion picture camera mountain sheep and goats at Jasper park, when suddenly before them appeared a mountain lion attacking a Billy Goat. The lion struck and the impact sent them both splashing into the river below. The Billy Goat escaped with no harm other than a good soaking. Mountain lions, like the rest of the cat family have a particular dislike to water.

## BOOST CANADA

We are a silent lot of Canadians!! God has given us the finest country in all the world, and half of us are afraid to talk about it.

We listen while Germany sings "Deutschland über Alles," and France sings the "Marseillaise," and Ireland sings "The Wearing of the Green" and our neighbors on the south sing "The Star Spangled Banner."

But when it comes our turn, we stand up half-shamed and, while the band strikes up the National Anthem or "O Canada," we leave the vocal part to the fellows on our right and left.

It's not that we are ashamed of our country. Dear Lord, No! Our only fault is that we are ashamed of our voice. We have been born in a land of mighty mountains and rolling prairies and become a silent people.

In our heart of hearts we are perhaps more proud of our country than men of other countries. We realize that we have a country with natural resources that are the envy of every nation under the sun—a potential wealth that if properly worked could buy up half the bankrupt nations of Europe and still leave us enough to sit in the rest of the Empire and the United States.

We know that we lead the world in wheat exports, that we have the most extensive fisheries in the world, the largest gold mine in the world, the largest inland port in the world, the world's largest nickel and asbestos deposits, the largest power dam in the world, the largest ranches in the world and that with only about six hundred thousand persons employed in the manufacture we turn out about four billion annually.

But it wouldn't be a bad idea if we forgot our little politeness a little sometimes and started to chorus the things up a bit. A little reminder to the world as to who, what, and why we are, and what we'll be in a year or two, would do no harm.

So let's get together right now and set a note for the rest of mankind to hear. —Merton S. Tretfall in "The Amphibian."

## ITEMS OF INTEREST

Here is a typographical error—"The bottle cry of freedom."

An Ontario boy lost his life as a result of blood poisoning from the horn of a catfish. Wounds however trivial should always be disinfected.

From Montreal and other Eastern points word comes that Miss Mildred Bennett, sister of the Hon. R. B. Bennett is making a great hit with both French Canada's and English in the tour of the province of Quebec.

Sir George A. Wills who died in London, Eng. on July 11 left a fortune of 10,000,000 pounds. The bulk of the fortune goes to his children and 4,000,000 pounds will go to the government in the shape of levy or inheritance.

The miraculous escape from death recorded by Captain Frank Courtney, transatlantic flyer when his airplane caught fire at midnight at 1500 feet and landed in flames on a rough sea, reads like fiction. The three flyers were picked up later by the S.S. Minnewaska after a terrible experience.

Some one points out that less than a century ago Queen Victoria travelled by stage-coach, King Edward was carefully conducted in his first ride in an automobile, and now the Prince of Wales owns his own airplane in which he makes many trips in safety. Here in Canada aviation is making rapid strides and the progressive towns as well as cities are arranging for landing fields for airplanes. It is the coming mode of travel.

President of the Canadian Trades and Labor Congress objects to the idea of Britain sending 10,000 miners to Canada to assist in the wheat harvest. It is a proposal that will stand some looking into at any rate. After the wheat harvest, what will these men do? Many of them are certain to remain in the country at least for the winter. Will they be self-supporting over Canada's season of unemployment or will they become a burden on urban municipalities?

Within three years Western Canada should have a rust resistant wheat which will grade as high as the varieties now being grown, according to L. H. Newman, Dominion cerealist, who arrived in Winnipeg from Ottawa this week. Mr. Newman is spending a month or more in the west, inspecting the work of the Dominion rust research laboratory at the Manitoba Agricultural college and the various Dominion experimental farms in the west. He will also visit farms where rust resistant grains are being produced for experimental purposes.

### EASTWAY NEWS

Mrs. Baldwin and family are enjoying  
a holiday in Calgary.  
Eastway people mean to be ready for  
threshing this year. William Marshall  
and Claude Brodick are getting their  
outfits ready.

The Eastway Women's Institute are  
putting on the play, "Not a Man in  
the House," at Union Jack school, on August  
15th, commencing at eight o'clock. Dance  
to follow.

Mrs. Fred Revely and son, of Redondo  
Beach, California, are visiting at the home  
of her sister, Mrs. M. P. Marshall. Mr.  
W. Bond, who has been to the coast for  
the past three years, has returned to stay  
at Eastway with his daughter, Mrs. M. P.  
Marshall.

### REID HILL NEWS

The Reid Hill U.F.A. is holding a  
dance in Peter Bowie's barn on Fri-  
day night, August 10th. Music is to  
be supplied by the Munson orchestra.  
Miss Mattie McFadden, of Coaldale,  
spent last week at Reid Hill the guest  
of Miss Merle McKay.

Mrs. Frank Clark, of Vulcan, spent  
the weekend with Mrs. Drummond.  
Mr. and Mrs. Finland returned last  
Thursday from a trip to Portland,  
Ore., and Yellowstone Park. They  
reported all roads in excellent con-  
dition and a very pleasant trip. They  
also mentioned that in their three-  
thousand miles they had not seen  
any country that looked as inviting as  
that around home.

Miss Evelina Bowie, a bride of this  
month, was the guest of honor at a  
miscellaneous shower given by Mrs.  
G. E. Drummond at her home on  
Tuesday afternoon. When the guests  
had assembled Mrs. Lockhart "spilled  
the beans," thus breaking the ice for  
a very enjoyable afternoon. Miss  
Marjorie Drummond, dressed as a  
miniature bride, paid her respects to  
Miss Bowie and then little Eileen  
Fitzpatrick came in drawing a wagon  
which carried a load of gifts. Miss  
Bowie in a winning manner expressed  
her appreciation for the many beau-  
tiful gifts and for the hearty good  
wishes, and invited all present to call  
upon her at her future home in Tur-  
ner Valley. A dainty lunch was  
served by Mrs. Drummond, thus  
bringing to an end a very enjoyable  
occasion. About forty guests were  
present.

### KIRKCALDY NEWS

Mr. Colwell has returned home  
after a month's vacation at the coast.  
Mrs. Zitter, of Ohio, is spending a  
few weeks with her cousin, Mrs. H. F.  
Boose.

Mr. Chauncey Tuttle and Mrs.  
Quinn are spending a few days with  
their parents, Mr. and Mrs. Charles  
Tuttle.

Mr. Franklin Cool, who was taken  
seriously ill on Friday, was rushed  
to the Calgary hospital Saturday  
morning.

Mr. and Mrs. Lacy Hollister were  
called suddenly to Keema to attend  
the sick bed of her mother.

Mr. Taylor, who has been spend-  
ing the past few months with his  
daughter, Mrs. Laing, has returned  
to his home in Saskatchewan.

Mr. and Mrs. A. Roebuck and  
daughter Gertrude, Mr. and Mrs. A.  
J. Maisey, who have been spending a  
few days at Banff, returned home on  
Wednesday.

### ITEMS OF INTEREST

Gasoline jumped in price about 2  
cents per gallon the other day. We  
do not know the reason why but no  
doubt it is caused by an excessive de-  
mand on the part of power farming,  
along with the great use being made  
of the auto in going here and there.

A substantial additional payment  
amounting to 10 cents per ton is to  
be paid immediately to beet growers  
who delivered their 1927 crop to the  
company. This is the second addi-  
tional payment made since delivery  
of the beets last fall and brings the  
net amount paid for the 1927 crop  
up to \$7.90 per ton. Beet growers  
have now received 18 cents per ton  
more for their 1927 crop than the  
total price paid for the beets deliv-  
ered in 1926 and sugar company officials  
anticipate that a further pay-  
ment is likely to be made at the end  
of the selling period for sugar, as  
there is still a large amount of Al-  
berta sugar in the warehouses of the  
company for distribution to the con-  
sumers of the province.

### ITEMS OF INTEREST

The Medicine Hat city council has  
been informed by the Manitoba Roll-  
ing Mill Company of Winnipeg that  
plans are in course of preparation  
for the reconstruction of the mill lo-  
cated in Medicine Hat, including the  
installation of an open hearth pre-  
ference to steam for the operation of  
the plant and is negotiating with the  
city, for the amount of electrical  
power required.

A feature of increasing interest in  
the activities of the Department of  
Public Health is the travelling child  
hygiene conferences conducted by the  
public health nurses skilled in baby-  
craft. The first series of conferences  
of this kind was sponsored by the  
Women's Institute of the Taber Con-  
stituency as a health project in 1921.  
Since that time the value of these  
conferences has been realized  
throughout the province, and this  
year arrangements have been made  
to hold conferences at 90 different  
points throughout the province.

Herman Trelle, whose winnings  
with wheat, oats and peas at the  
Chicago International have done so  
much to establish the reputation of  
the Peace River country as a grain  
growing area, has been adding fur-  
ther laurels to his already long list.  
Following Calgary and Edmonton ex-  
hibitions where his entries of grain  
stood at the head of their classes,  
Mr. Trelle was successful in carry-  
ing off championships in both wheat  
and oats at the International Grain  
Show held in conjunction with the  
Regina exhibition during the past  
week.

Lectures for the 1928-29 term of  
the University of Alberta will com-  
mence on Wednesday, September 26,  
according to the calendar which has  
been issued during the past week.  
Registration of first year students  
and new students for the second  
year will take place on September 23  
and 24 and registration of all other  
students on September 25 and 26.  
The last day for receiving applica-  
tions for supplemental examinations  
is fixed as August 21, the date on  
which these examinations begin. The  
Autumn matriculation examinations  
will commence on August 27.

The cornerstone of the new dormi-  
tory building being erected at the  
School of Agriculture at Vermilion  
was laid on Thursday, August 2, by  
Hon. George Hoadley, Minister of  
Agriculture. Work is progressing rap-  
idly on the new building which in  
addition to accommodation for some  
200 students, will include classrooms,  
library, gymnasium and assembly  
hall. The construction work is being  
done for the Department of Public  
Works by Bennett and White of Cal-  
gary and it is expected the building  
will be completed in readiness for  
the opening of the new school term  
on October 30.

High River Oilfields Limited has  
received its supplementary letters  
patent from the Secretary of State at  
Ottawa, increasing its authorized  
capital from \$150,000 to \$1,000,000  
with shares at \$1.00 par value. As  
soon as word has been received that  
its prospectus has been filed an issue  
of stock will be placed on the mar-  
ket immediately. This Company is  
fortunate in having \$1.00 par shares,  
as all the new Charters granted at  
Ottawa for oil companies have non-  
par stock. The Company has 1807  
acres in the vicinity of High River.  
C. C. Walker, managing-director of  
the Company and D. Austin Lane, es-  
timator of the Western Oil Examiner,  
made an inspection trip last week-  
end.

Over 100,000 acres of land owned  
by the Hudson's Bay Company in the  
Vermilion and Alexander districts  
have been withdrawn from the mar-  
ket for colonization purposes. A sur-  
vey of these lands has recently been  
made by agents of the company with  
the object of carrying out a plan of  
settlement similar to that adopted in  
the Clan Donald Colony. A small  
area will be broken on each quarter,  
comfortable farm buildings will be  
erected, a well will be drilled and the  
land will be fenced, and settlement  
will commence as soon as the im-  
provements have been completed.  
The intention is to have the entire  
colony of 250 families of British set-  
tlers placed on the land between now  
and next spring and in time to har-  
vest the first crop from their culti-  
vated land in 1929.

Enjoy  
**ESSEX Super**  
performance

and save enough to pay for a vacation

It is impressive to know that point for point the Essex Super-Six  
equals or excels any car up to \$300 or \$400 greater cost. But cold  
figures can't express the drama of this Ohio business man, who writes:

"My Essex gives me every fine car quality and per-  
formance ability which our former costlier car  
gave, and we saved enough to pay for the whole  
family's touring vacation."

\$885 and up

All prices f.o.b. Windsor, taxes extra

Buyers can pay for cars out of income at lowest available charge for interest,  
handling and insurance
